A Strategic Roadmap for Advancing Indiana's Life Sciences Industry

By 2033, Indiana will be known as a global leader in the life sciences industry—the place that advances innovations into products that improve health and well-being.

Foster an Environment of R&D and Innovation

Increase research activity and commercialization of innovations

Enhance Indiana's Manufacturing Ecosystem

Enhance supply chain resilience and promote local sourcing to reinforce our position as a global manufacturing leader

Boost Life Sciences Talent and Workforce

Expand and evolve our talent pipeline to support new research and manufacturing approaches and meet workforce demand.

Support Connections and Outreach
